INSURANCE & RISK MANAGEMENT

The U.S. experiences tumultuous and sometimes catastrophic climactic events, which leave you, the marine business owner, with uncertainty as to whether or not your operation is sufficiently insured. Potential perils, if not covered, could hamper your recovery or possibly result in permanent closure of your facility.

Swain & Baldwin is passionate about providing your marine operation with the coverage your business requires. We will provide you with solid expertise in the marine industry and design an insurance and risk management program custom-tailored for your specific business requirements.

We work only with "A" rated insurance carriers that have the expertise and experience to manage your special risks. Our relationships with marine providers enable us to market your account for the best coverage and terms for your risk profile. *Give us a call today!*

\* Not every risk qualifies for the above programs and coverage. Each account will be underwritten separately. Please refer to your finalized insurance policy for actual terms, conditions and coverage provided. Coverage also may not be available in every state.
